Manufacturing Extension Partnership

Energy/Environmental Program

The **Ohio Manufacturing Extension Partnership (MEP)** utilizes the entire network of engineering resources, equipment manufacturers and suppliers at its disposal to provide a complete and cost effective evaluation.

Ohio MEP provides a comprehensive array of on-site engineering support services and assessment for existing systems in the following value-added areas:

Power and Lighting

- Automated controls
- Equipment motors

Water Usage

- Facility reduction and reuse opportunities
- Process modifications
- Use of high pressure, low volume systems

Utilities Efficiency Assessments

- Compressed air systems
- Steam and condensation
- Refrigeration, heating and cooling systems

Water and Air Discharge

- Address regulatory and local municipal issues

Sustainability

- Process waste reduction
- Zero landfill initiatives

These services can generate large savings for your plant. In some cases, you might be able to receive supplemental funding for the audit!

Contact Ohio MEP at 567.225.3302 or info@northwestohiomep.org.

The Ohio Manufacturing Extension Partnership (Ohio MEP) supports this valuable industry by providing the products, services, and assistance that are dedicated to the productivity, growth, and global competitiveness of Ohio manufacturers.
